Problem Statement

Understanding customer behavior through sales patterns is vital for business growth. This analysis explores the Pakistan Sales dataset to identify key trends in purchasing based on gender, age, location, and product categories, helping businesses better target their audience and improve profitability.

Research Questions

1. Which gender contributes more to overall sales?
2. Which age group is most active in purchasing?
3. Which states generate the most orders and sales?
4. What are the top-selling product categories?
5. How do marital status and occupation influence purchasing behavior?

Hypothesis

1. Female buyers contribute more to total sales than males.
2. The age group 26–35 is the most active buyer group.
3. Married women are key contributors to high purchase amounts.
4. Food, Clothing, and Electronics are the most popular categories.
5. States like Sindh, Balochistan, and Punjab dominate in sales.

Data Summary

Data set link: https://drive.google.com/file/d/1nnKWrnxcXDHXKNc2gjlbcz1bmEzy4wPY/view?usp=drive_link

The dataset includes customer-level purchase data with the following attributes:

- Gender
- Age & Age Group
- State (Sindh, Punjab, Balochistan, etc.)
- Marital Status
- Occupation
- Product Category
- Amount (Total purchase)
- Orders

Data Cleaning Steps:

- Removed null values and unnecessary columns.
- Grouped and aggregated data for meaningful analysis.

Analysis Finding

Gender-wise Sales

Insight: Female buyers are higher in number and have greater total spending than males.

Age Group Analysis

Insight: Buyers aged 26–35 are the most active group, especially females.

State-wise Sales

Insight: Sindh, Punjab, and Balochistan lead in both the number of orders and the total amount spent.

Marital Status-wise Analysis

Insight: Most buyers are married women, indicating a strong purchasing power in this segment.

Occupation-Wise Sales Analysis

Insight: IT, Textile, and Retail buyers have higher purchase activity.

Product Category Wise Analysis

Insight: Food, Clothing, and Electronics are the top-selling categories.

Conclusion:

In conclusion, the majority of buyers are married women aged 26–35, highlighting a strong purchasing influence in this group. Females generally show higher spending patterns than males, especially in popular categories like Food, Clothing, and Electronics. Sindh, Punjab, and Balochistan have the highest sales, and people working in the IT and Textile sectors buy the most.

Suggestions

1. Businesses should target married women aged 26–35 with tailored marketing.
2. Focus more promotions in Sindh, Punjab, and Balochistan.
3. Stock more Food, Clothing, and Electronics based on demand.
4. Develop specific offers for professionals in IT and Textile.
5. Analyze seasonal trends further for better campaign timing.
